Request for Proposal: Community Clinic Appointment and Records System

Issued by Lakeview Family Clinics (fictional). All names and figures are fictional.

1. Background

Lakeview runs six neighbourhood clinics that book patients by telephone and keep paper charts. Waiting times are long and records are hard to find between branches.

2. Objectives

- Reduce telephone booking by moving appointments online.
- Give every branch the same patient record.
- Bill insurers from the visit data instead of re-encoding it.

3. Requirements Matrix

The bidder addresses every row of the matrix below.

ID	Function	Description	Priority
FR-01	Patient self-registration	Patients create an account with a mobile number and a one-time code.	Must
FR-02	Appointment booking	Calendar of open slots per doctor and branch, with booking and cancellation.	Must
FR-03	Appointment reminders	Text and email reminders 24 hours before a visit.	Should
FR-04	Walk-in queue board	Queue number, waiting list and a display screen for each branch.	Must
FR-05	Doctor schedule maintenance	Clinic hours, leave and slot length per doctor.	Must
FR-06	Patient medical record	Visit history, allergies, diagnosis and attachments for each patient.	Must
FR-07	Electronic prescription	Doctor writes a prescription from the drug list and prints it with a QR code.	Must
FR-08	Laboratory request and result	Request a test, upload the result, notify the doctor.	Should
FR-09	Billing and receipt	Consultation fees, senior citizen discount and official receipt.	Must
FR-10	Health insurer claims export	Monthly claim file in the insurer's format.	Should
FR-11	Clinic dashboard	Visits, no-shows and revenue by branch and month.	Should
FR-12	User and role administration	Accounts and permissions for doctors, nurses and cashiers.	Must

4. Quality and hosting

The system must answer ordinary screens within 3 seconds for 200 concurrent users, and must be hosted in the Philippines.

5. Commercial terms

Contract period of 9 months. Payment of 20% on signing, 50% on acceptance and 30% on go-live.
